FDA 510(k) Excerpt – Veridiq SARS-Flex

FDA 510(k) Premarket Notification – Executive Summary

Device Description

The Veridiq SARS-Flex (Model: DKS-US-V3) is a non-invasive medical device intended for use in clinical settings by trained healthcare professionals. The device uses proprietary sensor technology to provide real-time diagnostic support.

Manufacturer: Sentavia Precision GmbH, Freimannstraße 45, 80939 München, Germany

U.S. Agent: BTP MedTech Inc., 100 Market Street, San Francisco, CA 94105

Predicate Device

The 510(k) submission relies on the following predicate device: [PREDICATE DEVICE NAME], K201234, cleared DATE. The proposed device and the predicate are substantially equivalent with respect to intended use, technological characteristics, and safety and effectiveness.

Note: Full 510(k) submission to be filed Q3 2024. This excerpt is for internal review.

Substantial Equivalence

The device has the same intended use as the predicate. Technological differences exist (new sensor type) but these differences do not raise new types of safety and effectiveness questions. Performance testing demonstrates the device is at least as safe and effective.
